### **Waste Materials:**

1. Collect clean, dry, and non-toxic waste materials like:
  - Plastic bottles (cut into strips or shapes)
  - Old CDs (broken into pieces)
  - Cardboard tubes (cut into rings)
  - Fabric scraps (cut into strips)
2. Clean and sanitize the materials before use.
3. Sort and categorize materials by color, texture, and shape.

### **Plant Materials:**

1. Choose plant materials that are:
  - Dried and preserved (e.g., leaves, flowers, branches)
  - Non-toxic and hypoallergenic
  - Sustainably sourced (e.g., from your garden or local park)
2. Clean and dry the plant materials before use.
3. Sort and categorize materials by type, color, and texture.

### **Preparation:**

1. Cut and shape the waste and plant materials into desired forms.
2. Use eco-friendly adhesives (e.g., plant-based glue, beeswax) to assemble the materials.
3. Add embellishments (e.g., natural dyes, paint, markers) if desired.
4. Allow the materials to dry and harden completely.
